75	23070012666	2.8

NOTE: -

1. It may be noted that a comprehensive review of each question paper was carried out. In order to ensure fairness in evaluation, the incorrect questions were not considered. As an example, consider a question paper where 8 questions out of 100 are identified as incorrect.

Here are the proportional scores for two candidates:

- a) If Candidate A Scores 80 out of 92 questions, the Proportional score will be $(80/92) * 100 = 86.956$.
- b) If candidate B Scores 40 out of 92 questions, the Proportional score will be $(40/92) * 100 = 43.478$.

These proportional scores were calculated based on the percentage of correct answers in relation to the total number of questions attempted by each candidate. Candidate A achieved 86.956 of the maximum possible score, while Candidate B achieved 43.478.
